

easy-rip

De-shelling time

Easy-rip is the latest innovation from MACK4D. With easy-rip the cumbersome and time-taking „breaking“ of cast forms is a thing of the past. After printing and filling simply rip and remove the easy-rip with your hands – it can't get any faster and more efficient! You will be left with a perfect surface and the highest detail possible! Wall thicknesses under 1 mm can be printed safely due to the low viscosity and cleaning is quick and effective.

The advantages

- Effective quick post-processing (rip by hand!)
- Low viscosity, quick cleaning of the printer
- High reactivity, efficient construction times
- Transparent, safe filling of the cast form

Technical values

Color clear - transparent

Density 1.1 g/ml

Viscosity 0,3 Pa s

Hardness approx. 80 shore A

Ordering Information

Product	Description	Order number	Price in Euros
easy-rip	1 kg bottle, clear - transparent	10 07 20	249,00
easy-rip	0,5 kg bottle, clear - transparent	10 07 21	139,00
